## Target Description

1.2.3.1, 1.2.3.4, 1.2.3.8, 1.2.3.14, 1.2.3.19, 1.2.3.24-1.2.3.26, 1.2.3.34, 1.2.3.44, 1.2.3.56, 1.2.3.59, 1.2.3.63, 1.2.3.67, 1.2.3.75, 1.2.3.112, 1.2.3.137, 1.2.3.139, 1.2.3.169, 1.2.3.177, 1.2.3.189, 1.2.3.192, 1.2.3.215, 1.2.3.234, 1.2.3.237, 1.2.3.247, 1.2.3.249

## Overview

This Scanist assessment was performed against a total of 27 hosts. The chart on the right provides details on the number of threats discovered for each risk classification. The number of threats found for up to the last 10 scans of all the hosts in this network are shown below. Drastic changes indicate that something has impacted the security posture of these hosts and should be looked into immediately.

# Vulnerable Hosts

This Scanist analysis scanned 27 total IP addresses. Of those, 27 hosts were found active with outstanding vulnerabilities or open ports. The following table provides a brief summary about each of these active hosts and their analysis data.

Scanner: EXTERNAL

# Threat Differential

This section lists all of the differences in discovered threats for all hosts in this assessment. Differences are derived based on the results obtained on the date shown. Hosts that were scanned during a previous scan but not during a later scan are considered dead and will be listed. Similarly, hosts scanned during the latest scan only are considered new and will be listed as well.

The following hosts are considered new since only scanned during latest scan:

1.2.3.8, 1.2.3.14, 1.2.3.19, 1.2.3.24, 1.2.3.25, 1.2.3.56, 1.2.3.59, 1.2.3.63, 1.2.3.75, 1.2.3.112, 1.2.3.137, 1.2.3.169, 1.2.3.189, 1.2.3.215, 1.2.3.234, 1.2.3.237, 1.2.3.247
